

# LaserSharp **FlexPak** Services, LLC

## **LaserSharp®** Scoring:

LaserSharp FlexPak Services, LLC offers scoring of flexible packaging material for a variety of applications.

The **LaserSharp®** scoring process delivers controlled score depth for easy-open packaging that allows for controlled tear propagation while protecting the integrity and barrier of your film. The **LaserSharp®** scoring process improves the aesthetic appearance with precise score lines or shapes in registration with the print in both machine and transversal direction. Any unique easy-open feature or specific shape can be designed and laser scored into your package resulting in improved features, customer satisfaction, product safety and brand identification. This process has been proven for re-sealable, retort, and pourable packaging.

Laser Etched

## **Laser scoring advantages:**

- Straight lines or contoured easy open features
- Laser score capabilities in the machine direction, transversal direction or both simultaneously
- Microwave steam-release feature
- Controlled score depth
- Venting features
- Marking and etching
- Anti counterfeit applications
